ELECTRO POWER

Specializing in Solid State Motor Control

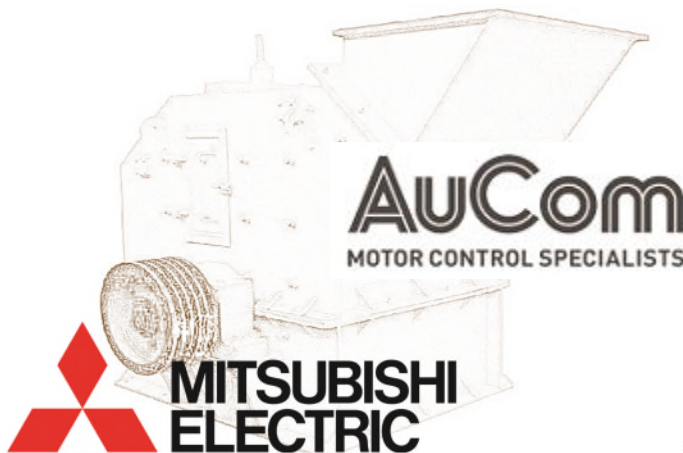

The BEST 24/7 Tech Support in the Industry

From the Electrician to Maintenance to the Operator, we take it very seriously that you never have to wait for answers.

Call Us Today for a Quotation. 414-476-6446

What we do is build panels for crushers, shakers, conveyors, slurry pumps and all other associated equipment as well as complete systems to run everything. What we don't do is build you a panel or sell you a product and that's the that, we're there to support you as long as you own it, 24/7 at no charge.

With over 30 years experience in the aggregate field, we know what you need, how to build it and we make it affordable. Call today with questions on anything, like "What would work best for my equipment", "I seem to be having a problem with someone else's stuff, what do you think?" or "Quote me a price on something".
